STRAN FLEX® revolve

MACHINE FILM

PRODUCT DESCRIPTION

STRANFLEX® revolve Machine Film is a high-performance stretch film engineered for demanding packaging operations, combining durability, efficiency, and sustainability.

Manufactured with 30% post-consumer recycled (PCR) content using advanced recycling technology, it delivers reliable load containment, excellent puncture resistance, and consistent 300% pre-stretch capability.

Less material is needed per pallet, reducing waste and overall carbon footprint without compromising on pallet stability or operational uptime.

APPLICATIONS

- Automated pallet wrapping in distribution centers
- Warehousing and logistics operations
- Food and beverage manufacturing
- Industrial packaging and shipping
- Retail supply chain management
- Cold chain and temperature-sensitive goods
