STRAN FLEX® PRODUCT GUIDE

Packaging that works as hard as you do

WHY STRANFLEX®

HIGH PERFORMANCE

VISUAL ORGANIZATION

GREAT VALUE

SUPERIOR PROTECTION

OUR BRANDS

STRANFLEX® ELITE + PERFORMANCE

When only the best will do, STRANFLEX® Elite delivers unmatched quality and performance. These premium products are engineered for the toughest packaging challenges, giving you peace of mind that every load is secure.

STRANFLEX® Performance products are your everyday heroes. They're reliable, consistent, and built to keep your operations running strong. They provide excellent hold and durability, so you can spend less time worrying about rework and more time focusing on what matters most.

STRANFLEX® prism

STRANFLEX® prism brings clarity and control to your packaging process. With vibrant tints and opaque colors, it's easy to identify loads, streamline inventory, and even add a layer of security by concealing contents.

Whether you're color-coding for efficiency or creating a distinctive look, this film helps you stay organized and stand out. We make it simple to combine functionality with visual impact.

STRANFLEX® revolve

STRANFLEX® revolve helps you protect your products and the planet by incorporating recycled content and more recyclable materials into these products. These more sustainable solutions support your sustainability goals without sacrificing strength or efficiency.

Together, we can make packaging smarter and more responsible.

STRANFLEX®

STRANFLEX® redefines reliability, efficiency, and durability in the world of packaging supplies. Whether you are securing shipments for transit, enhancing packaging performance, or streamlining your processes, **STRANFLEX** offers a comprehensive line of high-quality packaging solutions designed to meet the demands of modern industries.

Experience the difference that **STRANFLEX** can make for your business. With our superior packaging solutions and commitment to quality, we are your trusted partner in achieving packaging excellence. Join the growing number of satisfied customers who rely on **STRANFLEX** for their packaging needs.

STRANFLEX is an Imperial Brady exclusive brand.

PLUS PICK

Shop Smarter with PLUS Picks: Top Products Always in Stock

Discover PLUS Picks — a curated collection of our most trusted, high-demand products in Janitorial-Sanitation, Foodservice, and Packaging. Handpicked from elite supplier partners and our exclusive brands, PLUS Picks are always in stock at select distribution centers to ensure fast, reliable delivery when you need it most.

Whether you're stocking up for your production floor, manufacturing plant, food processing facility, warehouse, distribution center, or fulfillment center you can count on PLUS Picks to be there — no guesswork, no delays.

Look out for the PLUS Picks icon on products in this catalog!

* STRANFLEX products may not be available in all areas. Please see your local sales representative for details.

TABLE OF CONTENTS

Bin Liners + Pallet Covers 6

- Tape Dispensers 35

Bin Liners + Pallet Covers

STRANFLEX® Bin Liners and Pallet Covers deliver durable, multi-purpose protection for waste management and product storage.

Made from a strong LDPE/LLDPE blend, they resist punctures and tears, and are conveniently packaged on perforated rolls for fast, efficient use in busy operations.

DAMAGE PROTECTION

BIN LINER + PALLET COVER PRODUCTS

ITEM #	TYPE	DIMENSIONS	GAUGE	COLOR	CORE SIZE	ROLL WEIGHT	CASE PACK	PALLET PACK

Cable Ties

STRANFLEX® Cable Ties are built to tackle your toughest bundling challenges with confidence.

Engineered for long-lasting durability and dependable performance, and featuring a rugged one-piece design that delivers secure, hassle-free wire and cable management.

Select the perfect fit from a range of tensile strengths, lengths, and colors: natural for indoor use and UV-resistant black designed to withstand outdoor environments.

Edge Protectors

STRANFLEX® Edge Protectors are manufactured from 100% recycled chipboard (80% post-consumer/20% pre-consumer fibers), these edge protectors provide exceptional durability and load stability.

Designed to prevent compression, edge damage, and shifting during transit, they are ideal for protecting fragile products (such as food and beverage items), high-value palletized goods, and for long distance shipments.

Made in the USA.

100% RECYCLABLE

Labels
Direct Thermal

STRANFLEX® Direct Thermal Labels are designed for fast, efficient printing without the need for ribbons. Featuring a durable, matte-coated facestock and permanent adhesive, these labels deliver crisp, high-resolution barcodes and text while resisting smudging and moisture. They support streamlined workflows and reliable performance in high-volume packaging environments.

HIGH-VOLUME WORKFLOWS

IDEAL FOR SHORT-TERM USAGE

Fanfolded Labels: Labels are stacked in a zig-zag, accordion-style fold and feed from a box or tray behind the printer—ideal for high-volume printing and use with external label rewinders.

Roll Labels: Labels are wound around a cardboard core and loaded onto a spindle inside or outside the printer, making them the standard choice for desktop and mid-range printers.

ROLLS: 1" & 3" Cores | 4"x 6" & 4"x8" Labels

FANFOLDS: 4"x 6", 4"x 6.5" & 4"x8" Labels

Labels
Thermal Transfer

STRANFLEX® Thermal Transfer Labels are engineered for long-lasting durability and chemical resistance, using a matte-coated facestock and permanent adhesive. These labels produce dense, high-resolution images with wax, resin, or wax/resin ribbons, ensuring reliable identification and traceability in demanding environments.

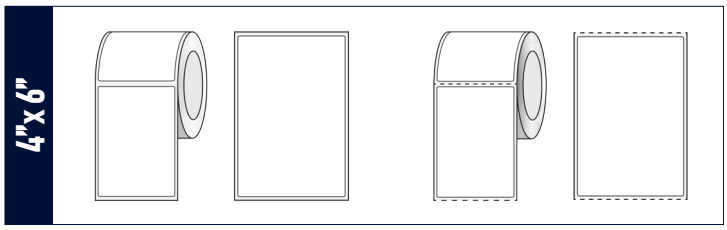

LONG-TERM READABILITY

REMEMBER WHEN PICKING LABELS TO...

- **Choose —** The label material based on the environment it's being used in
- **Consider —** The total cost as the right label material means less waste and maintenance
- **Consolidate —** Standardize label sizes when possible to reduce complexity and costs

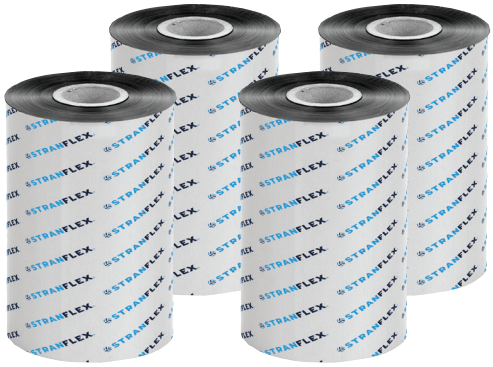

Thermal Transfer Ribbons

— ELITE + PERFORMANCE —

STRANFLEX® Elite + Performance Thermal Transfer Ribbons deliver sharp, high-speed prints for short-term labeling on paper substrates.

Performance offers cost-efficient, low-energy printing for everyday logistics and retail needs, while Elite provides bold, consistent quality across coated and rough surfaces for maximum versatility.

RELIABLE PRINT QUALITY

QUICK TROUBLESHOOTING GUIDE

ISSUE	LIKELY CAUSE	FIX
LIGHT PRINT	Low heat; high speed	Increase darkness; slow speed; clean head; use a higher grade wax ribbon
SMUDGING	Low heat; incompatible label	Increase heat; reduce speed; use uncoated paper; use a higher grade wax ribbon
WRINKLING	Low tension; misalignment	Re-thread; adjust pressure; increase tension; use 4.33" width
WHITE STREAKS	Dirty head/roller; dust	Clean head & roller; clear debris; verify ribbon path
POOR BARCODES	Low contrast; high speed	Increase heat; reduce speed; clean head; use a higher grade wax ribbon
RIBBON TEAR	Heat too high; tension too high	Lower darkness; reduce tension; check alignment

Packing List Envelopes

STRANFLEX® Packing List Envelopes are durable and provide secure, moisture-resistant protection for shipping documents in transit.

Available in both plain and "Packing List Enclosed" printed options, these envelopes feature a strong adhesive backing and a clear film front for easy document visibility.

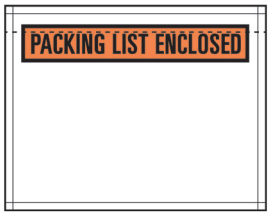

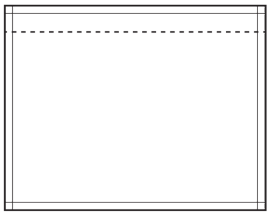

STRONG ADHESIVE

* Opening dimension listed first; ** **Printed:** Features a clear film front boldly printed with "Packing List Enclosed"

BEST PRACTICES FOR COMPLIANCE + VISIBILITY

- **For Fast Scanning —** Place packing list envelope in the upper right quadrant of the carton
- **For Maximum Adhesion —** Ensure the carton surface is clean, dry, and without dust
- **Use Top Loading For —** High volume packing, pallets or tall cartons
- **Use Side Loading For —** Heavy, multi-page documents, prevent documents from slipping out
- **Use Clear Packing List Envelopes For —** Multi- page documents and international paperwork
- **Use Printed Packing List Envelopes For —** Fast identification in high-volume situations

Innovation Starts Here.

At Imperial Brady, we believe that we are an extension of your team – your dedicated business partner to help you succeed. Our industrial packaging equipment innovation center offers a variety of benefits for businesses of any size.

Centrally located in Hot Springs, AR, we showcase the latest and greatest in packaging technology, allowing you to learn about new machines and processes that help improve your packaging operations. Get hands-on experience with equipment, and see how it can be utilized to improve your packaging line.

- Equipment Demonstrations
- Test Load Containment
- Performance Data Evaluation

Strapping
Steel Strapping
— ELITE —

STRANFLEX® Elite Steel Strapping is engineered for maximum strength and reliability in demanding industrial applications.

Available in both high tensile and regular duty grades, each strap is treated with a hard wax coating for smooth performance in automatic machines and around sharp corners.
Made in the USA.

HEAVY-DUTY PERFORMANCE

CHOOSING THE RIGHT TYPE OF STRAPPING

- **Steel —** Built for the toughest loads, steel strapping provides unmatched strength and rigidity. Ideal for heavy pallets and industrial shipments, especially in manufacturing, building materials, warehousing, and transportation industries. It ensures maximum safety and protection during transport. Best for heavy industrial leads with very high strength and low flexibility.
- **Polyester (PET) —** Lightweight yet strong, polyester strapping offers high tensile strength and excellent shock absorption. Ideal for securing pallets and shipments while reducing damage risk, it's a sustainable alternative to traditional steel in many applications. Best for medium to heavy pallets with good strength and moderate flexibility.
- **Polypropylene (PP) —** Cost-effective and versatile, polypropylene strapping is perfect for light- to medium-duty applications. Easy to apply by hand or machine, it delivers reliable load security without compromising efficiency. Best for light to medium pallets with moderate strength and excellent flexibility.

Strapping
Polyester (PET) Strapping
— ELITE + PERFORMANCE —

STRANFLEX® Elite + Performance Polyester Strapping offers high-performance load stability with excellent elongation and recovery.

Made from recycled PET, it delivers superior retained tension and impact resistance. It resists rust and corrosion, performs well under sun exposure, and reduces workplace injury risks due to its flexibility. A cost-effective alternative to steel strapping.

MADE FROM RECYCLED PET

Strapping
Polypropylene (PP) Strapping
— ELITE —

STRANFLEX® Elite Polypropylene Strapping is designed for light to medium-duty applications with excellent elongation recovery and minimal strap cycle interruptions.

Made from virgin material, it ensures consistent break strength and smooth performance in both manual and automated systems. Coils are individually boxed. Made in the USA.

SUPERIOR STRENGTH

The **STRANFLEX® Strapping Cart Standard Dispenser** is built for fast, efficient strapping with polyester, polypropylene, and steel materials.

Its solid steel frame, patented brake system, and quick-load design ensure smooth operation and durability in high-demand environments. Made in the USA.

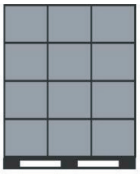

Item #SFPSTRAPCART; 1 each/box

- **Disc Size:** 16" x 6"
- **Strap Width:** Up to 3/4"
- **Face Width:** 3" – 8"
- **Wheel Size:** 10"
- **For:** Oscillated-wound strapping

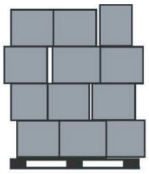

STRETCH FILM

DETERMINE THE LOAD TYPE

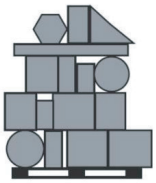

TYPE A

Type A Loads are uniform in shape, fit to the proper pallet size, and have few film puncture points. These are the easiest to wrap.

TYPE B

Type B Loads are less uniform, perhaps with an irregular stack pattern, pallet overhang, and more film puncture points. These are more difficult to wrap.

TYPE C

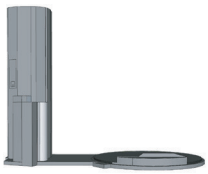

Type C Loads are oddballs, with major differences between loads and many film puncture points. These loads can be very difficult to wrap.

EVALUATE THE EQUIPMENT

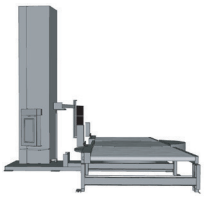

ENTRY LEVEL

Entry-Level Wrappers are the most basic of all stretch machines and depend on the spinning of the pallet to stretch the film as it is applied.

SEMI-AUTOMATIC

Semi-Auto Wrappers are intermediate machines operating at mid-speed. They are equipped with pre-stretch technology to provide improved load containment.

FULLY AUTOMATIC

Fully-Automatic Wrappers are high-speed, top-tier machines designed to quickly apply film to pallets in high-volume operations.

SELECTION GUIDE

CHOOSE A STARTING POINT

- **Identify which of the film categories could the best fit for your application.** Each category contains multiples sizes, thickness, and film characteristics to cover a broad range of industry needs.
- **Reference the chart below for a baseline as to where to begin your search.** The chart below shows the general linear progression of film quality directly related to machine quality. It also shows that while most Type A and B Loads are good fits for a STRANFLEX film, many Type B and C loads may require a special recommendation, specifically as the level of automation is increased.

	HAND-WRAPPING		ENTRY-LEVEL MACHINE	SEMI-AUTO/ FULL AUTO
TYPE A LOAD	Elite Pre-Stretch Hand Film	Performance Hand Film	Performance Machine Film	Elite Machine Film*
TYPE B LOAD	Elite Pre-Stretch Hand Film	Performance Hand Film	Performance Machine Film*	Elite Machine Film*
TYPE C LOAD*	Elite Pre-Stretch Hand Film*	Performance Hand Film*	Performance Machine Film*	Elite Machine Film*

* Needs further evaluation

UNCOVER OTHER FACTORS

- **Pallet Weight/Stability** are both important factors to understand. Although the load may look easy to wrap, a pallet with extreme min/max weights or an irregular center of gravity can be trickier to contain.
- **Product/Environment Specs** may call for some form of specialty film to be utilized. Examples of these are UVI (Ultra-Violet Inhibitor) films, or films with altered Coefficients of Friction for extra cling/slip.
- **Travel Distance/Route** could potentially alter the level of performance needed from a film to properly contain the load over long distances or when exposed to extreme physical forces during transit.
- **Containment Force** requirements will vary depending on multiple factors. However, a good industry baseline is allowing for 6lbs - 8lbs of containment force for every 600 pounds of pallet weight. Film gauge, stiffness, and quality all contribute to increased containment.

Stretch Film
Hand Banding Film
— PERFORMANCE —

STRANFLEX® Performance Hand Banding Film is available in narrow widths and does not require excessive force to apply, making it a user-friendly option. It can be used as an extra layer of security before applying full pallet stretch film for extra stabilization.

GREAT FOR BUNDLING SMALL ITEMS

Stretch Film

prism Hand + Machine Film

STRANFLEX® prism Hand + Machine Film are a premium cast wrapping solution designed for enhanced load visibility, security, and ease of use. Engineered for superior stretch, puncture resistance, and cling, this film simplifies wrapping while supporting efficient inventory management through vibrant color-coding. Available in both tint and opaque options, it ensures quick load identification and tamper-evident protection.

TAMPER-EVIDENT PROTECTION

Stretch Film

revolve Hand + Machine Film

STRANFLEX® revolve Machine Film is a high-performance stretch film engineered for demanding packaging operations, combining durability, efficiency, and sustainability. Manufactured with 30% post-consumer recycled (PCR) content using advanced recycling technology, it delivers reliable load containment, excellent puncture resistance, and consistent 300% pre-stretch capability.

Less material is needed per pallet, reducing waste and overall carbon footprint without compromising on pallet stability or operational uptime.

CONTAINS 30% PCR CONTENT

TAPE SELECTION GUIDE

TYPES OF ADHESIVES

- **Acrylic:** Acrylic tape is created by crosslinking monomers. It is either water- or solvent-based and is extremely resistant to degradation. Acrylic has a low shear (strength) but can be used in extreme temperatures (think freezer storage or warehouses without temperature control), can withstand no-to-high humidity, is UV resistant, and has an exceptional shelf life compared to hot melt tape. Acrylic tape may not be as durable as hot melt tape on the forefront, but it has some serious benefits depending on your application needs.
- **Hot Melt:** Hot melt tape, made from a polymer by combining resin and wax, is versatile and has a superior hold. This product is effective on difficult surfaces, fast to tack, easy to apply, and adheres to most packaging materials (cardboard, a recycled bubble mailer, and much more). Although hot melt tape is strong, it doesn't fare well in unstable or extreme climate conditions, and it will deteriorate and discolor over time, especially when exposed to UV light, so it's not ideal for long-term storage.
- **Water-Activated:** Water-activated tape is starch-based, made from synthetic fibers, and typically used for corrugated packaging materials. It's environmentally friendly and tamper-evident (useful to help tell if a package has been opened.)

CHARACTERISTICS OF EACH TYPE OF TAPE

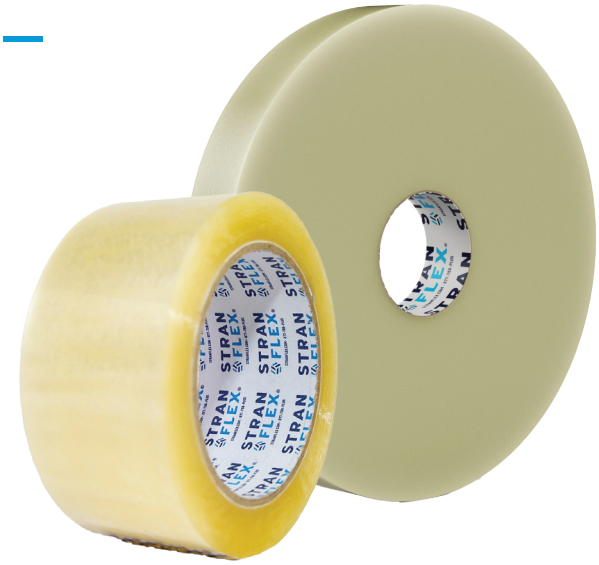

TAPE TYPE	BEST FOR	KEY STRENGTH	TEMPERATURE RESISTANCE	SUSTAINABILITY	OTHER CHARACTERISTICS
ACRYLIC TAPE	Long-term storage & varying climates	Crystal-clear, long-lasting seal	Excellent (cold & heat resistant)	Moderate	UV & humidity resistant
FILAMENT TAPE	Heavy-duty bundling & strapping	Reinforced tensile strength	Good	Low	Good for industrial applications
HOT MELT TAPE	High-speed carton sealing	Instant adhesion & strength	Limited (best at room temp)	Moderate	Easy to apply; higher sheer
MASKING TAPE	Surface protection & light-duty tasks	Easy application & removal	Moderate	Low-Moderate	Good for finishing work
WATER ACTIVATED (WAT) TAPE	Secure, tamper-evident carton sealing	Superior bond, eco-friendly	Excellent	High (paper-based recyclable)	Higher sheer; humidity resistant

Tape
Acrylic Tape
— ELITE —

STRANFLEX® Elite Clear Acrylic Tape is a high-performance packaging solution crafted with durable BOPP film and a pressure-sensitive, water-based acrylic adhesive.

Engineered for clarity and long-lasting adhesion, it's ideal for applications requiring visibility, strength, and reliability across a wide temperature range.

Whether you're sealing cartons in a cold warehouse or a warm distribution center, this tape delivers consistent, professional results.

LONG-LASTING ADHESION

Tape
Acrylic Tape
— PERFORMANCE —

STRANFLEX® Performance Clear Acrylic Tape is a high-quality, pressure-sensitive packaging tape designed for consistent, long-term adhesion in a wide range of environments.

Constructed with durable BOPP film and a water-based acrylic adhesive, it delivers excellent clarity, strong bonding to corrugated surfaces, and dependable performance in both hot and cold conditions.

Ideal for high-volume operations, it ensures secure seals without the need for heat, moisture, or solvents—making it a versatile and cost-effective choice for everyday carton sealing.

DURABLE IN EXTREME ENVIRONMENTS

Tape
Filament Tape
— ELITE + PERFORMANCE —

STRANFLEX® Elite + Performance Filament Tape are reliable and durable tape reinforced with fiberglass filaments and backed with a durable polypropylene film.

Meant for demanding industrial applications where holding strength is essential. The Elite tape features a solventless synthetic rubber/resin adhesive, whereas the Performance tape uses high-tack synthetic rubber adhesive.

Tape
Hot Melt Tape
— PERFORMANCE —

STRANFLEX® Performance Clear Hot Melt Tape is a durable, pressure-sensitive packaging solution designed for fast, secure carton sealing in high-demand environments.

Built with tough BOPP film and a high-quality hot melt adhesive, it delivers instant tack, strong adhesion, and dependable performance — even under extreme temperature and pressure conditions.

Ideal for general-purpose use, it's a cost-effective choice for fast-paced packaging operations.

TAPE TERMINOLOGY

- **Backing/Carrier —** The material that is on the outside of the tape; usually made from paper, cloth, plastic, or rubber.
- **Tack —** The initial stickiness of the adhesive part of the tape. It explains how quickly your tape will bond to the application material.
- **Cohesion —** The substance that makes up the adhesive and holds it together and creates the stickiness of your tape.
- **Adhesion —** The bond between your tape and the surface of the application. Tack and cohesion provide short-term reversible bonding, while cohesion and adhesion create a more permanent bond. Adhesion and tack produce a quick-stick type of bond. All three processes determine how well your tape adheres to any surface and for how long.
- **Shear —** The 'holding power' of your tape. It is measured by the time required for a certain amount of weight to cause the tape to come loose from a vertical plane. The better the shear of a tape, the longer it will hold up.

Tape

Water Activated (WAT) Tape

— ELITE + PERFORMANCE —

STRANFLEX® Elite + Performance Water Activated Tape are reinforced kraft paper tape for dependable carton dealing when extra strength is needed.

With a water-activated adhesive that penetrates carton fibers to form a permanent, tamper-evident bond, it delivers superior durability, load integrity, and environmental performance—even in extreme conditions.

Tape Dispensers

STRANFLEX® Economy Pistol Grip Tape Dispensers feature an ergonomic design for comfortable use, smooth tape application, and a natural rubber roller with an adjustable brake for customized tension control.

Item #SFPTD2ECO: Compatible with 2" tape width; 24 pieces/case

Item #SFPTD3ECO: Compatible with 3" tape width; 12 pieces/case

STRANFLEX® Deluxe Pistol Grip Tape Dispensers feature a retractable blade for enhanced safety, an adjustable brake for tailored tension, and natural rubber roller for consistent application.

Item #SFPTD2DLX: Compatible with 2" tape width; 24 pieces/case

Item #SFPTD3DLX: Compatible with 3" tape width; 20 pieces/case

For use with 3" core tapes

STRANFLEX® Mousetrap Pistol Grip Tape Dispensers

The 2" Mousetrap dispenser offers easy, one-handed tape application with adjustable tension for precise control. Durable and lightweight, it's perfect for quick, efficient packaging in any setting.

Item #SFPTD2MT: Compatible with 2" tape width; 40 pieces/case

The 3" Mousetrap dispenser provides smooth, reliable tape dispensing for larger tape rolls. Its ergonomic design and adjustable tension make it ideal for heavy-duty packaging tasks, boosting efficiency and comfort.

Item #SFPTD3MT: Compatible with 3" tape width; 24 pieces/case
