

BECOME AN IICRC CERTIFIED COMMERCIAL CARPET MAINTENANCE TECHNICIAN (CCMT)!

This seminar provides technical information and hands-on practice of the proper procedures, chemicals and equipment needed to clean, remove spots, repair, maintain, and restore all common types of carpeting found in commercial and residential properties.

DETAILS

The course reviews carpet manufacturing, construction style, fiber characteristics, installation techniques, and how these issues impact cleaning and maintenance results.

During the course, all commercially viable carpet and rug cleaning methods (wet, dry, and low moisture) will be discussed, shown, and/or used.

The course will conclude with a discussion of how to plan, set up, and maintain a carpet cleaning and maintenance program in any type and size of facility or business.

Instructor: Mark Exner
