

CUSTOMER SPOTLIGHT

Brown University
Providence, Rhode Island

Brown University's Nelson Fitness Center has taken a sustainable leap forward with the introduction of SportsArt's innovative ECO-POWR™ equipment, thanks to the initiative of international student Elina Pipa. Inspired by her Climate Solutions class, Pipa led the charge to integrate eco-friendly fitness solutions into the campus gym.

Partnering with SportsArt, Brown University has transformed its fitness center into a hub of renewable energy generation. By harnessing human movement, these state-of-the-art cardio machines convert physical exertion to clean, usable electricity, aligning seamlessly with the university's ethos of environmental responsibility.

Amy Dean, Fitness and Wellness Manager at Nelson Fitness Center, echoes the sentiment, emphasizing the transformative impact of student-led initiatives. With the implementation of SportsArt's equipment, the center not only promotes physical well-being but also champions environmental consciousness, fostering a culture of sustainability among students and staff.

FACILITY TYPE:
UNIVERSITY RECREATION CENTER

SPORTSART PRODUCTS:
7

FACILITY SIZE:
15,000 SQ. FT. (1,394 SQ. M)

POTENTIAL ENERGY PRODUCTION:
3,136 KW/YEAR

It's so cool to see a student's idea come to life. The Nelson Center has been creating a better, more welcoming, and sustainable environment for students, and this project really falls in line with that vision

Amy Dean | Fitness and Wellness Manager, Nelson Fitness Center
