SELECTING DISHWASHER GLASS RACKS

To determine the number of compartments needed, place an inverted glass on the diagram to the right.

Looking down on the glass, select either 49, 36, 25, or 16 compartment size, making sure that the greatest diameter of the glass is no larger than the appropriate square. (Note: When measuring cups or mugs, be sure to allow for extension of handles.) Then measure the overall height of the glass.

The rack compartments must be deeper than the height of the glass, not only to allow for stacking, but also to reduce breakage from glasses hitting each other during the washing process.

Racks vary by manufacturer. Some have add-on risers to increase compartment depths, others are of one-piece construction.

SUPPLIES + SUPPORT

We are a leading specialized distributor and solution provider focused on JanSan, foodservice, and industrial packaging. We are driven to make customers more successful and operations more sustainable and more productive.

We offer Supplies PLUS Support: Premium brands, expert advice, and exceptional customer experiences. Our 6,000 associates have a passion for delivering innovative solutions for the business challenges of today and tomorrow.

Together, we serve thousands of customers nationwide in end markets, including education, government, healthcare, hospitality, restaurants, building services, food packaging & processing, and grocery.
