

CUSTOMER SPOTLIGHT

Cleveland State University
Cleveland, Ohio

At Cleveland State University (CSU), sustainability is more than just a buzzword—it's a guiding principle that shapes student life and campus initiatives. As the winner of the 2024 SportsArt Campus Challenge, CSU earned the opportunity to integrate ECO-POWR™ cardio equipment into its Recreation Center, turning each workout into a step toward a greener future.

By installing seven ECO-POWR™ units, CSU enables students to convert their exercise energy into usable electricity, furthering the university's commitment to environmental stewardship.

By incorporating SportsArt's ECO-POWR™ technology, Cleveland State University is turning individual workouts into collective impact. The partnership supports student health, environmental responsibility, and financial efficiency—all while shaping a more sustainable future.

FACILITY TYPE:
UNIVERSITY RECREATION CENTER

SPORTSART PRODUCTS:
7

FACILITY SIZE:
152,000 SQ. FT. (14,121 SQ. M)
