

CUSTOMER SPOTLIGHT MONKTON STADIUM

Location
Jarrow | South Tyneside
United Kingdom

Facility Type
Community
Center

ECO-POWR™ Products
9

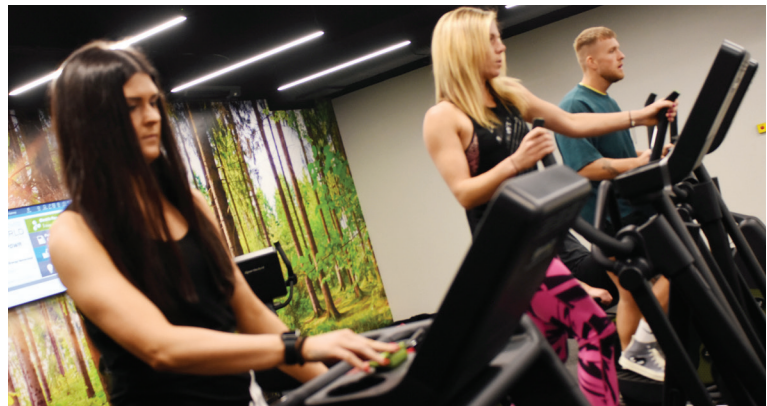

Potential Energy
Production
4,032 KW/year*

Since the June 2023 installation, Monkton Stadium has become more than a fitness center; it's a community hub driving positive change. The response from the community has been overwhelming, with increased membership interest and sales. Members actively engage with the SA WELL+™ system, understanding how their workouts contribute to the region's carbon-neutral pledge by 2030.

Monkton Stadium's green gym represents a shift in fitness culture. The installation of SportsArt's ECO-POWR™ line signifies a commitment to harnessing human energy for positive environmental impact. From the carbon-negative G660 Treadmill to the energy-generating G260 Rower, Monkton Stadium has not only revamped its facilities but redefined the very essence of fitness.

“ THE TRANSFORMATIVE IMPACT OF SPORTSART'S ECO-POWR™ LINE GOES BEYOND THE GYM EQUIPMENT. IT HAS CREATED A SENSE OF COMMUNITY PRIDE AS OUR MEMBERS ACTIVELY CONTRIBUTE TO A SUSTAINABLE FUTURE WITH EVERY WORKOUT ”
