

Air Mover

Built with an injection molded polypropylene copolymer housing to withstand the harsh, every-day use of contract cleaners, restoration professionals and more. In addition, this material is much lighter than other molded housings making this unit not only durable, but lightweight as well. Due to its lightweight, durable construction, our fan will outlast other competitive models. With three different speed settings and operating positions, you can determine the correct air flow and velocity for maximum performance. Use to dry carpets, rugs, padding, subfloors, cabinets, dry-wall, paint, closets, baseboards, attics, furniture, draperies, or just about anything you need to dry. This machine increases air-flow, cleaning efficiency, safety, and minimizes down-time in a room or large facility.

PRODUCT FEATURES

- » Space saver stackable design takes up less room in storage
- » Easy to transport with optional telescoping handle for easy portability
- » Meets OSHA standards for maximum weight / size
- » Adjustable kickstand with three operating positions
- » Reinforced motor lugs to prevent damage in transport
- » 3 speed settings for controlled drying - Whether you are in a noise sensitive area or are in a larger facility, each setting can cater to your space and the drying tasks that need to be done to quickly dry your space
