

CUSTOMER SPOTLIGHT

Pearl River Community College
Poplarville, Mississippi

Pearl River Community College has officially installed its grand prize package from the 2nd Annual SportsArt Campus Challenge Sweepstakes, energizing the college's Wellness Center with cutting-edge, energy-producing fitness equipment designed to support both physical health and environmental sustainability.

The SportsArt Campus Challenge Sweepstakes invited college students across the country to share how they live greener on campus. Haley Cronin of Pearl River Community College was selected from three finalists as the Grand Prize winner. As a result, Pearl River received \$75,000 worth of SportsArt's ECO-POWR™ treadmills, a revolutionary line of cardio equipment that converts human energy into utility-grade electricity—feeding power back into the grid with every workout.

The summer installation has already drawn positive attention from faculty and summer-session students. With the fall semester on the horizon, the college anticipates even greater engagement from returning students.

FACILITY TYPE:
UNIVERSITY RECREATION CENTER

SPORTSART PRODUCTS:
5

POTENTIAL ENERGY PRODUCTION:
2,240 KW/YEAR

We are beyond thrilled with our new SportsArt treadmills! These machines are truly next level. Not only do they offer a smooth, high-quality workout experience, but they also feed usable electricity back into the facility as you exercise. It's an incredible feeling to know that our fitness efforts are contributing to sustainability!

Tara Rouse, Wellness Center Director
