

Low Profile Air Mover

This compact unit is changing the blower/dryer market as we know it today. The KleenLine Low Profile Air Mover is dramatically lighter and smaller, offering high airflow volume with velocity of 3,200 feet per minute. What's more, with a compact and light "briefcase-style" profile and maximum running amps of only 2.4, this unit creates the perfect drying performance, size and affordability. If you're looking for greater drying flexibility, the deluxe unit can be placed horizontally, vertically, on its side against the wall, or at a 20 degree angle with the kick-stand, directing airflow exactly where you need it most. The deluxe model offers an integrated power outlet, enabling you to connect up to five air movers together at one time for whole-room drying in large spaces.

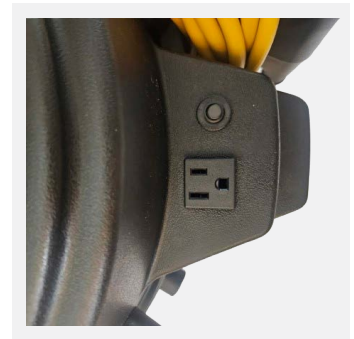

PRODUCT FEATURES

- » Weighs up to 45% less than a traditional blower
- » Multi-directional operation with 3 drying speeds
- » The ability to daisy chain five units together
- » Compact size allows you to fit two units where one standard blower would fit
- » Perfect drying for carpets, rugs, hard floors, general air circulation, paint, draperies, upholstery, and more
