Taking Control of Your Cutlery Starts Here

Business owners like you face mounting responsibilities ... from sustainability and hygiene to elevating customer experience. So, the products you rely on must help to meet these challenges. Fortunately, Dixie Ultra® SmartStock® innovations are engineered to streamline operations and impress guests. Just what you'd expect from the leader in foodservice dispensing technology.

THE SMARTSTOCK® ADVANTAGE

HYGIENIC, TOUCHLESS SYSTEMS

Hygienic, automatic dispensing means no buttons or levers to push, helping to improve hygiene and reduce contamination. Patrons touch only the utensils they need.

CONTROLLED, ONE-AT-A-TIME DISPENSING

SmartStock® systems are engineered to dispense cutlery one utensil at a time, helping to reduce cutlery usage and minimize the need to reload cutlery.

RELIABLE TECHNOLOGY, SMALL FOOTPRINT

Operators trust SmartStock® dispensers to perform effectively and consistently. And with space at a premium, they require very little counter space and can be conveniently mounted on the wall.

WASTE SAVING

Controlled, one-at-a-time dispensing helps reduce cutlery waste, which means less cutlery for employees to replenish and less landfill trash.

EASY AND INTUITIVE FOR EMPLOYEES

Cutlery dispensers are easy to customize to the operator's preference and preloaded, dispenser-ready cutlery skewers help reduce loading time. Colored display indicators show when refills are needed.

A SHOWCASE FOR YOUR BRAND

A selection of colorful dispenser inserts and adhesive "skins" are available with themes such as hygiene and sustainability. You may also order customized versions that reflect your own brand and messaging.

Meet Our High-Capacity 3-in-1 Cutlery Station

Finally, a dispenser that helps operators meet their most pressing challenges: reducing cutlery usage, improving hygiene, streamlining employee tasks, and maximizing counter space. SmartStock® Tri-Tower sets a new standard for dispenser performance that your patrons will appreciate.

Why SmartStock® Tri-Tower is Good for Business

Reduces Cutlery Usage by **31%¹**

Holds Up to **390 Utensils**

HIGH-CAPACITY ADVANTAGE

Holds up to 390 utensils, the most of any SmartStock® dispenser—so restocking is less frequent. Pre-counted refills can also help reduce restocking time.

HYGIENIC, FULLY ENCLOSED 3-IN-1 STATION

Patrons conveniently get all their cutlery at one station. Utensil chambers are enclosed and protected within the dispenser, and restocking is hygienic and easy.

COMPOSTABLE² CUTLERY

Adopting Series-T Compostable Cutlery is an excellent way to elevate your sustainable footprint, particularly since the Tri-Tower Cutlery Station can reduce cutlery usage by 31%¹.

Universal chambers let operators configure the dispenser with any combination of Series-T utensils.

¹SmartStock® Tri-Tower reduces cutlery usage on average by 31% vs. open bins. (Independent research commissioned by Georgia-Pacific: CUT-19-2024)

²Compostable in commercial composting facilities only. Such facilities may not exist in your area.

Put the Wrap on Cross Contamination

Helping protect customers and employees from cross-contamination is a business priority. And there may be no worse culprit than open cutlery bins. Fortunately, there's an innovative, hygienic alternative to open bins and traditional wrapped cutlery: the SmartStock® Wrapped Cutlery System.

A Cutlery Upgrade for All the Right Reasons

HYGIENIC TO PROTECT CUSTOMERS

Helps reduce cross-contamination with the combination of individually wrapped utensils distributed via a touchless dispenser.

DRIVE-THRU & DELIVERY FRIENDLY

Of course, this elegant system is ideal for dine-in customers. But it's also a responsible—and efficient—addition to drive-thru and delivery operations.

LESS WRAP, LESS LANDFILL

Cutlery is wrapped on the critical end only, using 60% less wrap than fully wrapped cutlery. Plus, one-at-a-time dispensing decreases cutlery waste.
