## EASTERN REDBUD

*Cercis canadensis*

Known as the harbinger of spring, the **Eastern redbud**'s delicate blossoms and buds are one of the season's most dramatic displays. But this tree's beauty doesn't end with its flowery show. Unique and irregular branching patterns combine with a trunk that commonly divides close to the ground to create a very handsome, spreading, and often flat-topped crown.

The Eastern redbud blooms in a profusion of rosy pink flowers in April and features heart-shaped leaves that emerge a reddish color, turning dark green as summer approaches, then yellow in the fall.
