FIBCs/Bulk Bag Packaging

An **FIBC** (Flexible Intermediate Bulk Container) commonly referred to as a "Bulk Bag," (typically manufactured from woven polypropylene or rPET), which:

- Is handled mechanically by forklift trucks, cranes or hoists when filled
- Is designed to be lifted from the top by means of integral, permanently attached devices (lift loops, stevedores, or sleeves)
- Is intended for shipment of flowable materials (including, but not limited to, materials in powder, flake, or granular form)
- Are lightweight, strong, flexible, and durable

SUPPLYING FIBCS SINCE '99

Our manufacturing partners in the United States and across the globe deliver excellent quality in a timely + cost-effective manner. Our plants and shipping agencies provide up-to-date information so that you will know when your bags are scheduled to arrive.

Imperial Brady can produce bags made with industrial, food, or pharmaceutical grade specifications to suit your needs. Whether it is standard bag, or you require anti-static capabilities, we can produce bags with Type-C or Type-D Crohmiq™ fabric. Our plants are ISO, BRC, Kosher, and Halal certified.

ISO 22000:2005 FOOD SAFETY MANAGEMENT SYSTEM · ISO 9001:2015 · BRC FOOD CERTIFICATED · KOSHER KCJ
