

Concerned about the best way to clean & disinfect?

Introducing the WAXIE VERSA High Performance No-Touch Cleaning Caddies.

What is WAXIE VERSA? It's a no-touch cleaning system designed to remove the maximum amount of bio pollution. Each machine combines automatic chemical metering and injection, an indoor pressure washer, and a powerful wet vacuum into an integrated system. This combination allows workers to thoroughly clean without touching contaminated surfaces.

According to a recent scientific study, the WAXIE VERSA no-touch cleaning process was 60 times more effective at removing bacteria and other biohazardous contaminants than mopping. Rather than push the dirt and germs around, the system allows for rinse and full removal of all soil and chemicals with the use of the vacuum.

When used with the proper WAXIE disinfectants, The WAXIE VERSA systems are a powerful ally in the fight against COVID-19.

See next page for product information.

When using a disinfectant, it is critical to make sure that the proper products have been selected for your building surfaces and anticipated soils, and that your custodial crew is properly trained on these disinfecting guidelines:

- 1 Train custodial staff on the correct disinfectant for use
- 2 Always pre clean heavily soiled areas first
- 3 Select the appropriate disinfectant based on the listed kill claims
- 4 Read the disinfectant label instructions for proper usage, dilution, surface type, and recommended PPE
- 5 Ensure the disinfectant has enough surface contact dwell time and remains wet and active for the prescribed time to target the pathogen

When combined, the WAXIE VERSA and WAXIE Solution Station 3-liter bottles of superconcentrates listed below dispense ready-to-use disinfectants for all types of applications in restrooms, kitchens, healthcare, schools and more. Each cleaning chemical is designed to attack specific soils inherent in various settings, like restrooms, kitchens, industrial, healthcare, schools and more. Developed specifically for no-touch cleaning, these high quality chemicals are low foaming and free rinsing for fast, spot free drying.

WAXIE VERSA HIGH PERFORMANCE CLEANING CADDIES

Item #	Product	Pack	Power	Type	Notes
