WHAT IS PASSIVE AIR FRESHENING?

No Batteries!

- There is no power source for passive air fresheners. Unlike sprays, passive scent release is based solely on the interaction of air with the product, and does not rely on a propellant or mechanism for dispensing. Passive fresheners include bowl clips, adhesive fresheners, or refills that are enclosed in a non-mechanical housing.

Air Fresheners

- Refills fit a variety of other commercial dispenser brands
- No-Mess Performance
- Dry fragrance refills won't break, spill or leak
