- 4 One-handed bucket and bottle fill
- 5 Locking cabinet prevents tampering
- 6 Door opening for product identification and chemical level visibility
- 7 Compact design enables installation in small spaces 25.24"W x 26.2"H x 9"D
- 8 Large push button activation with bottle fill and bucket fill icons
- 9 Button lock

WAXIE  [®]
SOLUTION & STATION [®]

The three predominant methods of using chemicals are ready-to-use, bulk concentrates and dilution control. Each method has its place in the cleaning operation, and each has its specific benefits.

Ready-to-Use (RTU) | RTU is convenient and is particularly good for chemicals that are difficult to concentrate effectively. These include floor finishes, high-acid cleaners and metal polishes. When other products such as glass cleaners, all-purpose cleaners and degreasers are in RTU packaging, they are very costly versus concentrates.

Bulk Concentrates | Products such as degreasers, floor strippers, glass cleaners, etc. are often sold in concentrate form. These are packaged in various sizes (pre-portioned packages, cartridges, gallons, drums, etc.). Instructions are provided for dilution (one ounce per gallon, one packet per mop bucket, etc.), and it is up to the user to correctly measure both the chemical and the water. This is commonly known as the “glug-glug” method.

Dilution Control | Concentrated cleaning chemicals are effectively diluted according to manufacturer specs or customer needs by a device that automatically measures out the concentrate and the water at certain proportions. These devices can range from wall-mounted units to hand-held miniature dilution systems.

Why choose Dilution Control?

When possible, dilution control of chemicals is the most beneficial method you can use. Dilution control provides you with the most cost-effective use of chemicals; reduced “re-cleaning” because the cleaning job is done with the right dilution the first time; and reduction of hazards because the system, not the people, handles the concentrated chemicals.

The WAXIE® Solution Station® System provides you with the most **flexible, accurate, safe** and **cost-effective** use of chemicals. With multiple dispensing options and chemicals available, WAXIE Solution Station systems can be designed to meet all of your cleaning chemical needs!

SOLUTION STATION®

Safety | The closed-loop system spill-resistant bottle prevents worker exposure to chemicals. Secured bottle inserts, locking cabinets and racks create a tamper-resistant system. WAXIE Solution Station products have simple descriptive names and are color- and number-coded with full-color in-use application photos on chemical concentrates and secondary labels to help your employees always use the right solution in the right place.

Accuracy | The color-coded metering tip is safely locked away in the concentrate bottle using a closed-loop insert to prevent tampering with the dilution ratio and to ensure end-user cost per usable gallon, thus providing consistent product performance.

Flexibility | WAXIE Solution Station dispensers provide unparalleled end user flexibility to customize a dilution control dispensing system designed to meet the needs of any institutional or industrial cleaning application.

Effective and Economical | Specially formulated superconcentrates, precise dilution, increased worker safety, and simplicity in use all add up to the most effective and economical dilution control system you can find.

Tamper Resistant

Closed-Loop

Color-Coded

What is SOLSTA™?

SOLSTA is short for Solution Station, WAXIE's unique dilution control system that includes dispensers and a wide variety of chemicals.

WAXIE designs our systems to **take the guesswork out of dilution control**. We want to ensure the right product is hooked up to the right dilution control button so we actively reinforce this with the use of color-coding, numbers, pictures, etc. The WAXIE secondary labeling system also helps ensure spray bottles are filled used correctly (photos of the product in-use, easy-to-read labels, etc.).

In addition, these systems help prevent staff from coming in contact with the chemical when changing concentrate refills. This **reduces hazards** because the system, not the cleaning staff, handles the concentrated chemicals. Back flow prevention devices in the dispensers meet all plumbing codes and minimize harmful side effects such as foaming.

340016 WALLCHART

We also offer a dedicated Solution Station mobile training site, complete with training guides which describe proper use of cleaning chemicals. WAXIE has informative bilingual wall charts that can be located at dilution stations, as well as bilingual **Safety Data Sheets**.

SOLUTION STATION®

A closed-loop, accurate, safe and spill resistant chemical dispensing system. Full-color, in-use application photos on chemical concentrate refills and secondary labels help your employees always use the right solution in the right place.

WAXIE® Solution Station® Dispensers

SOLSTA NEXGEN™
VERSATILE DILUTION CONTROL

WAXIE® SOLSTA NEXGEN™ | Versatile Dilution Control

The ultimate in Versatility with its capability of dispensing up thirty-one different **Solution Station®** products for the bucket fill and bottle fill application.

SOLSTA FDC™
FLEXIBLE DILUTION CONTROL

WAXIE® SOLSTA FDC™ | Flexible Dilution Control

Dispense one product at a time with the flexibility to quickly change to a different product. Features ability to dispense product with one hand to fill spray bottles, and a 7-foot remote fill gun for bucket fill applications.

SOLSTA PDC™
PORTABLE DILUTION CONTROL

WAXIE® SOLSTA PDC™ | Portable Dilution Control

Designed to dispense ready-to-use solution for all types of applications ranging from bottle fill to bucket fill to equipment fill to direct spray applications.

WAXIE® Solution Station® Chemical Compatible

KleenLine™ VERSA™
PRO

KleenLine™ Pro Versa No-Touch Cleaning Caddy

A Versatile whole building no-touch cleaning machine! Supports a multitude of cleaning challenges from vacuuming, washing floors and walls, to cleaning locker rooms. Converts to a complete carpet care cleaning machine for vacuuming, spotting, extracting and pressure washing.

Chemical Dispensing For Any Application

Education | Safely and effectively clean and disinfect campus surfaces to provide a clean and safe learning environment for students and staff.

Government | Achieve a clean, healthy, green, and safe building environment while also meeting governmental executive orders.

Hospitality | Effectively and efficiently clean, disinfect, degrease, and deodorize surfaces on your property to provide a clean and fresh guest experience for visitors.

Industrial/Manufacturing | Remove the toughest soils, and greases with WAXIE® Solution Station® cleaners and degreasers.

Food Processing | Degrease and sanitize food prep areas, glassware, utensils, processing equipment and machinery.

Healthcare | Provide a clean and healthy environment for patients, staff, and visitors which has been effectively cleaned and then disinfected with hospital-grade disinfectants.

Building Service Contractors | No matter the surface or cleaning challenge, WAXIE® Solution Station® cleaning chemicals can help you get the job done quickly, effectively, and on-budget.

Commercial Real Estate | Deliver a clean, healthy, and high-performing workplace for building occupants with WAXIE® Solution Station® cleaning chemicals.

SOLSTA NEXGENTM
VERSATILE DILUTION CONTROL

Wall-Mounted Dispenser

The **WAXIE® SOLSTA NEXGEN™** is a lockable dispensing cabinet with durable rotomolded polyethylene doors and a built in drip tray. The dispenser is the ultimate in Versatility with its capability of dispensing thirty-one different **Solution Station®** products for both bucket fill and bottle fill applications. The metering tip is safely locked away in the concentrate bottle using a closed-loop insert, to prevent tampering with the dilution ratio and ensure end user cost per usable gallon.

#321055 Flex Gap, #321058 Air Gap

- 1 Clear water rinse feature
- 2 Directional arrows indicate which chemical is being dispensed
- 3 Label free design offers the flexibility to swap products as needed
- 4 One-handed bucket and bottle fill
- 5 Locking cabinet prevents tampering
- 6 Door opening for product identification and chemical level visibility
- 7 Compact design enables installation in small spaces 25.24"W x 26.2"H x 9"D
- 8 Large push button activation with bottle fill and bucket fill icons
- 9 Button lock
- 10 Metering tip is safely locked away in the concentrate bottle

-  Pre-setup out of the box, no assembly required
-  Pre-plumbed for up to 4 bottle and 3 bucket fill applications
-  Easy servicing with unobstructed dual doors – no tools required
-  Easy to access valve assembly
-  Drip tray with drainage
-  Compact design
-  Durable ABS plastic cabinet with reinforced ribbing construction

SOLSTA  **FDC**™
FLEXIBLE DILUTION CONTROL

Wall-Mounted Dispenser

The **WAXIE® SOLSTA FDC™ (Flexible Dilution Control)** dispenser is designed to quickly change out **Solution Station®** products and to reduce the time spent setting up new chemicals. The dispenser features one handed fill for spray bottles and a 7-foot remote fill gun for bucket and equipment applications.

#321070 Flex Gap, #321071 Air Gap

- 1 Clear water rinse feature
- 2 Label free design offers the flexibility to swap products as needed
- 3 One-handed bucket fill
- 4 One-handed bottle fill
- 5 Quickly change out Solution Station products
- 6 Metering tip is safely locked away in the concentrate bottle
- 7 Compact design enables installation in small spaces 11"W x 23.8"H x 7.8"D

Dispense ready-to-use solutions safely and easily with the one-handed spray bottle fill or bucket fill options.

-  Pre-setup out of the box, no assembly required
-  Drip tray with drainage
-  Compact design
-  Durable ABS plastic cabinet with reinforced ribbing construction

SOLSTA PDC[™]
PORTABLE DILUTION CONTROL

Portable Dispenser

The **WAXIE® SOLSTA PDC™ (Portable Dilution Control)** is a reliable, low-cost, portable proportioning dilution control system that attaches to the **Solution Station®** 3-liter bottles of superconcentrates. It is designed to dispense ready-to-use solution for all types of applications ranging from bottle fill to bucket fill to equipment fill to direct spray applications. The metering tip is safely locked away in the concentrate bottle using a closed-loop insert, to prevent tampering with the dilution ratio and ensure end-user cost per usable gallon.

#321016 WAXIE SOLSTA PDC

- 1 Number coding
- 2 Nozzle hose
- 3 Bucket hanger
- 4 Nozzle
- 5 Selector assembly
- 6 Trigger
- 7 Dispenser handle
- 8 Hose coupling
- 9 38 mm locking nut
- 10 Bottle collar
- 11 Color-coding

#321056 WAXIE PDC Foam Spray Attachment Foam | Spray | Water Rinse

- 1 Ergonomic handle
- 2 Foam or spray options
- 3 Back drip guard
- 4 Broad spout for fanned spray pattern

Foam/Spray Attachment Option

Easily add the foam/spray wand attachment.

Apply to walls, floors and counter surface areas.

SOLSTA PDC™

PORTABLE DILUTION CONTROL

- ✔ No installation time
- ✔ No service requirements
- ✔ Fingertip dispensing
- ✔ Small, lightweight, portable
- ✔ Bottle, bucket and equipment fill
- ✔ Water rinse setting capability
- ✔ Foam spray accessory option

Portable Bucketless Mopping System

Tired of carrying around a mop bucket or wringing out soggy mop pads? Move your daily mopping routine to the next level with the **KleenLine™Pro Fast Glide™ 18" Mopping System**.

Works in any application from house cleaning and maintaining gymnasiums to cleaning hospitals. It is ideal for cleaning areas where conventional buckets and wringers are impractical.

This all-in-one mopping solution features a removable translucent dispensing bottle with a wide opening for easy filling with fill level markers in both ounces and milliliters. The click-on/click-off flow actuator function on the handle works like a ball point pen to reduce hand fatigue—no need to continually squeeze the trigger to dispense product—and the all-stop ball valve ensures a positive-on and positive-off flow control.

Microfiber mopping pads can be color-coordinated for each area of use as well as **Solution Station®** chemical pairing. The vertical polypropylene scrubbing strips allow for better deep grout line cleaning by creating scrubbing action. With microfiber, the solution can be reduced to as low as 2-gallons. Because less water is used, there is less liquid on the floor allowing it to dry faster, which helps reduce the potential for slip-and-fall accidents.

#651814 KleenLine™Pro Fast Glide™ 18" System

- 1 16" hook-and-loop frame
- 2 32-ounce dispensing bottle
- 3 Tethered cap
- 4 54" handle with sliding hook for storage
- 5 Flow actuator
- 6 All-stop ball-valve
- 7 Microfiber mopping pad (not included in kit)

**KleenLine™ VERSA™**
PRO

WAXIE® Solution Station® Chemical Compatible

Designed for soil and bacteria removal, the **KleenLine™ Pro Versa No-Touch Cleaning Caddies** can be paired with **WAXIE® Solution Station®** Chemicals to ensure fresh solution and rinse water, which prevents cross-contamination resulting in clean, safe and healthy building environments.

The KleenLine Pro Versa cleaning caddies are no-touch cleaning systems designed to remove the maximum amount of bio pollution. Each machine combines automatic chemical metering and injection, an indoor pressure washer, and a powerful wet vacuum into an integrated system. This combination allows workers to thoroughly clean without touching contaminated surfaces.

- 5 SOLSTA Dispenser Gallon Capacity
- 6 Long Range Spray Line
- 7 Spray Gun with High/Low Pressure Modes
- 8 3-Stage Vacuum Motor
- 9 500 PSI Pump
- 10 HEPA Filter

Fast.

Cleaning restrooms takes **1/3 the amount of time** with the **KleenLine Pro Versa** systems than it would with traditional cleaning methods, and the results are astronomical!

Easy.

Spray Solution

High Pressure Rinse

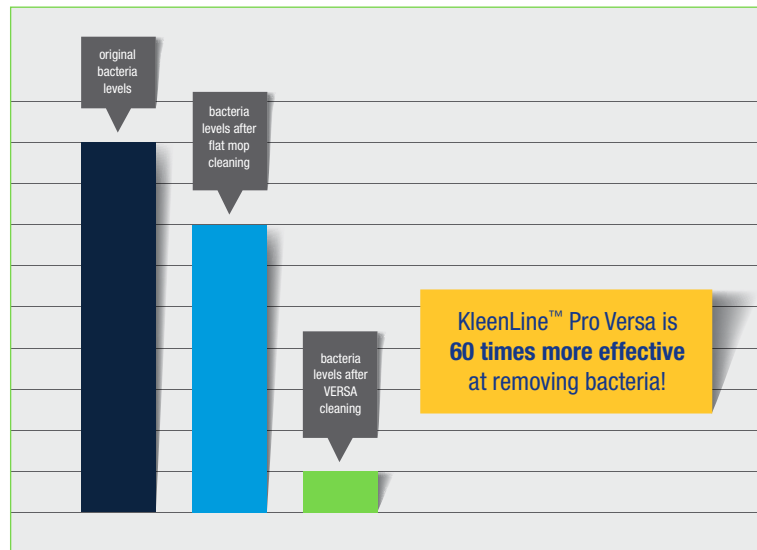

Vacuum Dry

Effective.

According to a recent scientific study, the **KleenLine Pro Versa** no-touch cleaning process was **60 times more effective** at removing bacteria and other biohazardous contaminants than mopping. Rather than push the dirt and germs around, the system allows for rinse and full-removal of all soil and chemicals with the use of the vacuum.

KaiTutor™

KleenLine Pro Versa machines include the KaiTutor™ an onboard training system designed to help custodial workers excel at job-related activities by delivering critical operational and educational information right when and where it's needed - on the job. The result is just-in-time skill building for improved performance and productivity. Mounted directly to Versa's cleaning systems, the KaiTutor makes personal training readily available in a stimulating format. Now, even inexperienced workers can quickly become highly productive cleaning professionals. And, it's a convenient way to reinforce prior formal training.

710 Multi-Purpose Disinfectant Cleaner

Pack	4/3 L
Dilution Ratio	1:256 (.5 oz/gl)
Bottle Makes	204
Case Makes	815
Fragrance	Lemon
Color	Yellow

CACC Certified

An economical, one-step, hospital-grade, disinfectant cleaner that is effective against a broad spectrum of bacteria (including Community Acquired Methicillin Resistant Staphylococcus aureus [CA-MRSA], Methicillin Resistant Staphylococcus aureus [MRSA], Staphylococcus aureus [staph], Vancomycin Intermediate Resistant Staphylococcus aureus [VISA], and Vancomycin Resistant Enterococcus [VRE]), is virucidal (including HIV-1 [AIDS] Virus, Hepatitis B Virus [HBV], Hepatitis C Virus [HCV], and Influenza A2/Hong Kong), fungicidal, and inhibits the growth of mold and mildew and their odors when used as directed. This product is a no rinse, neutral-pH, disinfectant cleaner that disinfects, cleans and deodorizes in one labor saving step. Will not dull most metal-interlock floor finishes. Can be used with a mop and bucket, trigger sprayers, sponge, or by soaking. Appealing citrus fragrance with lemon and lime notes. Included on List N: 710 Multi-Purpose Disinfectant Cleaner has demonstrated effectiveness against SARS-CoV-2 virus responsible COVID-19 on hard non-porous surfaces in 1 minute!

VOC CONTENT

	<p>Products meet South Coast AQMD “Clean Air Choices” Cleaner Certification Program for ultra-low VOCs. To qualify, must have a VOC content less than or equal to 10 g/L or tested by SCAQMD.</p> <p>Test method 313-06. Calculations account for all formula ingredients including low vapor pressure ingredients. (www.aqmd.gov)</p> <p>* Manual VOC Calculation: % VOC at Concentrated Level / Specific Gravity * 100% / Dilution Ratio = % VOC Diluted.</p>
---	---

NSF – NONFOOD COMPOUNDS PROGRAM

NSF A1	Designates a cleaner/degreaser that can be used on a food contact area. Cleaner/degreaser must be rinsed with potable water after use.
NSF A4	Designates a cleaner/degreaser that can be used in an area where food is handled or prepared, but not used on food contact surfaces, i.e. – a floor cleaner.
NSF A8	Designates a degreaser WHICH can be used on a food contact area. Degreaser must be rinsed with potable water after use.
NSF C1	Designates a product that cannot be used in food preparation or handling area. These products can however be used in areas of food plants where food is not present.
NSF D2	Designates an antimicrobial agent that does not require a rinse.

BIOBASED CONTENT

** Biobased determination using ASTM-D6866-08 Method-B Mean Biobased Result as +/- (absolute) Beta Analytic Inc.

*** % Biobased (calculated values from manual formula)
High: 51-90%, Moderate: 21-50%, Low: 20% or less.

HMIS

H	Health	HMIS® III is a distinctive label using numerical hazard rating system that gives data on health, flammability and physical hazards of a chemical.
F	Flammability	
R	Reactivity	

GREEN SEAL

	<p>Green Seal® is a US-based, independent, non-profit organization whose mission is to identify and promote products and services that have less impact on human health, the environment and our natural resources. Green Seal certified products have met strict criteria for reduced toxicity, reduced packaging and required performance testing, as verified by a third-party review and a manufacturing site-audit, as well as ongoing compliance monitoring.</p>
---	--

UL ENVIRONMENT / ECOLOGO*

	<p>UL Environment is a global independent safety science company whose mission is to advance global sustainability by supporting the growth and development of environmentally preferable products, services and organizations. UL Environment’s ECOLOGO Program offers credible third-party certification of products and services which have a reduced environmental impact. ECOLOGO product certification is a voluntary, multi-attribute, lifecycle-based environmental certification that indicates a product has undergone rigorous scientific testing, exhaustive auditing, or both, to prove its compliance with stringent, third-party environmental performance standards.</p> <p>* Certified for reduced environmental impact. View specific attributes evaluated: ul.com/el</p>
---	--

CARPET & RUG INSTITUTE (CRI) SEAL OF APPROVAL

	<p>CRI has a Seal of Approval for carpet cleaning products which includes spotters, in-tank, pre-spray, encapsulates, as well as pet stains and odors. Additionally, their Seal of Approval program includes equipment such as extractors and vacuum cleaners. The CRI Seal of Approval program tests the effectiveness of carpet cleaning equipment and certifies deep cleaning extractors that effectively remove soil without damage to the carpet.</p>
---	--

SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

	<p>South Coast AQMD established the “Clean Air Choices” Cleaner Certification Program that focuses on very low-polluting cleaning products used by maintenance and cleaning professionals. A product must contain 10 grams per liter or less of VOCs.</p>
---	---
